Patient Information

Supportive Care Fridays

Taking pride in caring

Who is this for?

This programme is for people with cancer who are unable to receive treatment or for whom treatment is palliative.

What happens?

This six-week course will follow a set programme in a supportive, relaxed environment, with each week focusing on something different.

Each week will include two educational sessions, touching on issues including financial advice, relationships, complementary therapies, symptom management, and a practical session.

Sessions will run from 10.00am until 2.30pm every Friday in the Nightingale Macmillan Day Unit, Royal Derby Hospital. Lunch and refreshments will be provided. You are welcome to bring one carer along for each visit.

Please bring any medication you require during the day and anything else you would usually bring for day-to-day activities.
